SKY SNIPER

AIR LAUNCHED PRECISE GUIDED MISSILE

Sky Sniper is an autonomous, air-to-ground, cost-effective, precision strike missile. With its rocket motor Sky Sniper is an effective stand-off weapon, capable of fast response, high velocity impact for multiple types of targets, without entering hostile air defense systems threat zones.

Sky Sniper is simple, fast, and hard to intercept, and can be a game-changer in the modern battlefield.

Features:

- Precise GPS/INS guiding system
- High velocity and trajectory shaping increases rocket survivability
- Multiple carrying platforms: F-15/16 A/F-18, MIG-29, SU-30, IAI KFIR and more
- Up to 4 missiles on aircraft
- General purpose warhead with blast fragments for various target types
- Simple mission planning, simple to operate, simple maintenance
